

Generate high-quality radiology reports quickly and efficiently.

Reinventing radiology reporting for a changing world.

Challenge.

In today's demanding healthcare environment, how can providers remain competitive, meet growing regulatory requirements, comply with quality performance measures, support population health management, and transition to new value-based models of care?

Solution.

PowerScribe 360 Reporting, the industry's most trusted and widely used real-time radiology reporting solution, enables quick, efficient generation of high-quality reports to maximize productivity, optimize billing and reimbursements, increase referring physician satisfaction and improve quality of patient care. Proven speech recognition technology combined with structured yet flexible and personalized dynamic reporting supports rapid turnaround times and ensures reports are accurate, consistent and actionable.

PowerScribe 360 Reporting enables continuous quality improvement by streamlining report generation and communicating important clinical information throughout the healthcare enterprise.

Supports individual styles and preferences.

A full range of dictation styles are supported to accommodate individual preferences and provide maximum productivity and flexibility — whether you self-edit or use a transcription service.

Custom data capture and extraction.

Built-in access to configurable data entry tools enables information to be captured when it is needed most, streamlining workflows and improving accuracy.

Peer review.

Automated peer review saves time, improves efficiency and drives quality improvements by eliminating cumbersome manual compliance processes.

Mobile access.

With PowerScribe 360, mobile devices can be used to search radiology-specific content to assist with diagnoses and securely edit, sign and distribute reports.

Report version compare.

Quick and easy identification of changes between subsequent versions improves resident education and allows administrators to readily assess transcription quality.

Key benefits

- Incorporates the award-winning Dragon Medical speech recognition engine, delivering unsurpassed speech accuracy of up to 99%.
 - Structured data facilitates quality measure reporting, participation in registries and data exchange with EHRs to reduce error-prone and time-consuming manual data entry.
 - Flexible data integration capabilities allow easy import of data directly from modalities to significantly improve productivity, reduce potential for error and simplify regulatory reporting.
 - Enhanced tabular presentation of patient data boosts referring physician satisfaction, improves understanding of findings and streamlines ability to monitor disease progression.
 - Rapid access to relevant outside images through Nuance PowerShare Network expedites care decisions and minimizes unnecessary repeat exams.
 - Cooperative development with leading EHR/EMR and RIS/PACS vendors ensures solutions work within existing infrastructures to maximize IT investments.
-

“The future of healthcare is value-based. The capabilities we are leveraging with PowerScribe 360 certainly are enhancing this transition.”

Dr. Samir Patel
Director of Radiology Inc.’s Value Management Program
Elkhart General Hospital board member

Quality Guidance.

Quick and easy access to evidence-based guidelines at the point of documentation enables consistent follow-up recommendations to reduce risks and improve patient outcomes, while incorporation of Nuance’s unparalleled Clinical Language Understanding engine provides real-time feedback on errors and inconsistencies and ensures critical findings are identified and appropriately communicated.

MONTAGE™ Search and Analytics.

Powerful tools for tracking and analyzing business and clinical performance provide efficient access to aggregate data for improved visibility and reporting of key metrics.

Critical Test Results Management.

Rapid closed-loop communication of findings with automated documentation satisfies regulatory compliance and improves patient care.
